

Circular blades

Fig. A

Built with 130 alternating straight / trapezoidal cutting edges, this blade is particularly suitable for automatic cutting centers and cut-off machines.

The high number of cutting edges ensures optimal processing of PVC profiles with gaskets.

The chip limiter gives the blade greater stability and consequently a better finish of the cut piece.

Particolare fig. A
Dente con limitatore

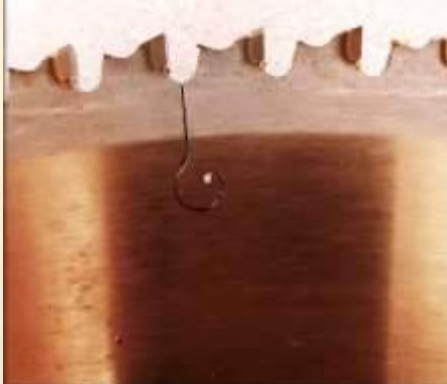

Fig. B

Built with 188 alternating straight / trapezoidal cutting edges, this blade is particularly suitable for automatic cutting centers and cut-off machines. The high number of cutting edges ensures optimal processing of PVC profiles with gaskets.

DIAMETER	THICKNESS	HOLE DIAMETER	Z (n° Teeth)
500	4	30	130 + limiter
500	4	30	188
450	4	30	160
400	4	30	160
